

VACUKLEEN 347

Highly alkaline and non-foaming liquid product, used in ultrasonic and spray processes for the total and rapid removal of machining oil.

COMPATIBILITY:

- Titanium
- Carbides
- Steels
- Precious metals
- Stainless steels
- Plastic materials

INGREDIENTS:

- Surfactants, phosphates
- Chelating agents, anti-corrosion agents

PHYSICAL AND CHEMICAL DATA:

■ pH concentrated: 14

pH (1%): 12.4Density: 1.265

■ Surface tension of concentrated chemical: 42.9 mN/m

BENEFITS:

- Excellent preparation of surfaces prior to vacuum metallisation processes (PVD)
- Alternative to chlorinated solvents that does not attack cobalt
- Degreases, breakes emulsions and separates oils (an oil separator is required on the installation)
- Protects parts from oxidation, does not attack metals
- Long life of the baths
- Leaves a protective film

20/11/18

INSTRUCTIONS FOR USE:

The optimum conditions for use are aff ected by the quality of the water used in the baths and the type and quantity of contaminants.

Concentration: 3 to 5%

Temperature: 50 to 60°C (122 to 140°F)

■ Time: 2 to 5 minutes

Warning: always use hot baths (between 30 and 40°C / 86 and 104°F)

STORAGE CONDITIONS:

- Keep the recipient hermetically sealed between 5°C and 40°C (41°F and 104°F) in a dry place.
- Always keep in packaging made from the same material as the original packaging.

PROCESS EXAMPLE:

Cleaning cutting tools made out of carbide and sensitive steel
